

Proposed Cell Tower, East Main, Paris, KY

Mr. Johnson:

Thank you very much for notifying me last week of the FCC's decision to require Towerco2013 to fulfill the environmental assessment for their cell tower proposed for East Main Street in Paris, KY.

Because the Paris-Bourbon County Joint Planning Commission is meeting on March 21, 2019, it is imperative that I receive notification from you that the FCC has instructed the applicant to complete the environmental assessment so that the zoning meeting can be postponed until the requirements have been met. If the zoning meeting is held and the cell tower is approved there will be no recourse short of Circuit Court. This could be avoided with a short email from you stating the FCC decision for the required completion of the environmental assessment.

I look forward to hearing from you regarding this matter. Thank you again for your attention to this concern of many citizens of Paris.

Mary Clay
