Executive Summary

Thank you for your interest in iWorQ Systems! We have been providing government software solutions since 2001 and serve more than 1,500 customers throughout the United States and Canada. We lead the industry in delivering hosted web-based solutions and were the first vendor in this market to provide a fully web-based system.

Since cities and counties often have limited capital budgets, we lease our applications so that our clients are not confronted with large capital investments and our annual support and maintenance fees do not increase year to year. We have found that this model allows agencies to plan for growth in a cost-conscious way.

To access our applications all you need is an internet connection and your choice of device including desktops, laptops, smartphones (iPhone, Android) and tablet devices (iPad, Galaxy, etc.) The system's graphical user interface, including all screens and dashboards, is natively touch screen enabled allowing your staff the flexibility to determine which device to utilize inside the office or in the field.

We are confident in providing a solution that can improve your internal communication as well as increase your responsiveness to your citizens and customers while reducing the time and effort from your staff. We also provide additional access through our Citizen Engagement mobile app and web portal for internal staff and citizens.

Thank you again for considering iWorQ, we will follow up with you to review any questions you may have about this proposal and the next steps in our consultative sales process.

Best Regards,

Adam Laing
Vice President

Application Description

iWorQ software solutions and professional services together provide a seamless fit for Paris software project. Having implemented over 1,500 customers and configuring a unique fit for each one provides our team the experience and background required to ensure a successful implementation.

iWorQ's browser-based software is an off-the-shelf system which requires no custom modifications to the code, only configuration of the application which requires no coding. As it is already utilized by hundreds of offices of all different sizes, we can scale and configure as much as needed for each implementation in order to meet your project goals. The system will provide access in the field and in the office, assuring your staff will be efficient and have all the data necessary to run a paperless system. iWorQ's hosted solution provides a smooth transition from your current system because much of the complexity of setting up the server hardware and networking environment is not required, which helps save time, money, and resources.

Since iWorQ's applications are configurable, we are able to provide a familiar and intuitive system that easy to use and understand. For example, when a user logs in, their screen contains only the fields on their dashboard that are pertinent to them, which makes the training process resonate with each of the end users. iWorQ implementers will consult with each department during the set-up process to configure the applications in order to meet the unique needs of each of your departments.

Project Initiation and Management

Throughout the history of our company, iWorQ's success with adding and maintaining customers can be accredited to our carefully structured methodology and approach with each implementation. Our phased project methodology allows regular checkpoints and frequent opportunities to ensure that all of our team members are in sync. During the planning phase, our project teams meet to analyze how each department operates today, and how you would like your new system to work going forward. Based on our discussions, we create a project plan, agree on major milestones, and set a project schedule. The project plan will also address communications, managing risk and change management.

Throughout the project, iWorQ will hold regular status meetings in which both teams report on progress, tasks, and timelines, as agreed upon during the planning phase and outlined in the project plan. The iWorQ project manager acts as your main point of contact during the project and works with your staff to ensure that adequate communication takes place, assuring that the project moves along smoothly.

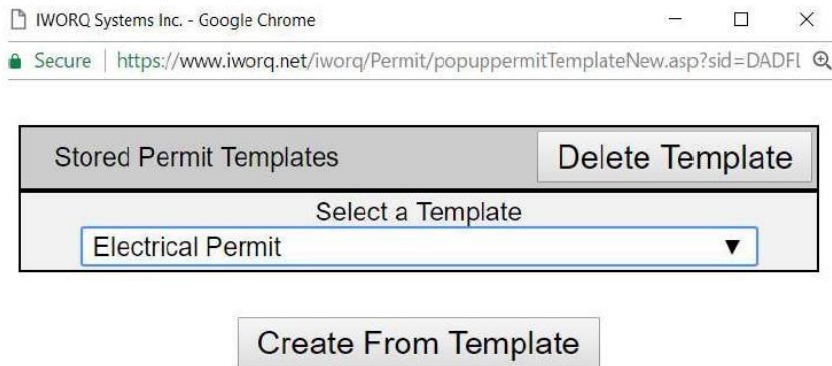

iWorQ has standard documentation to record decisions made during the project. These documents list tasks, person responsibilities, decisions made, etc.

Developing Specific Deliverables for Your Project

The iWorQ team works with your subject matter experts (that you assign) during the initiating and planning phases to determine what deliverables to build for your solution (e.g., reports, documents, templates, and dashboards etc.). After we create a deliverable, we test it to ensure it meets your specifications and then pass it to your team for user acceptance.

Figure 1.1

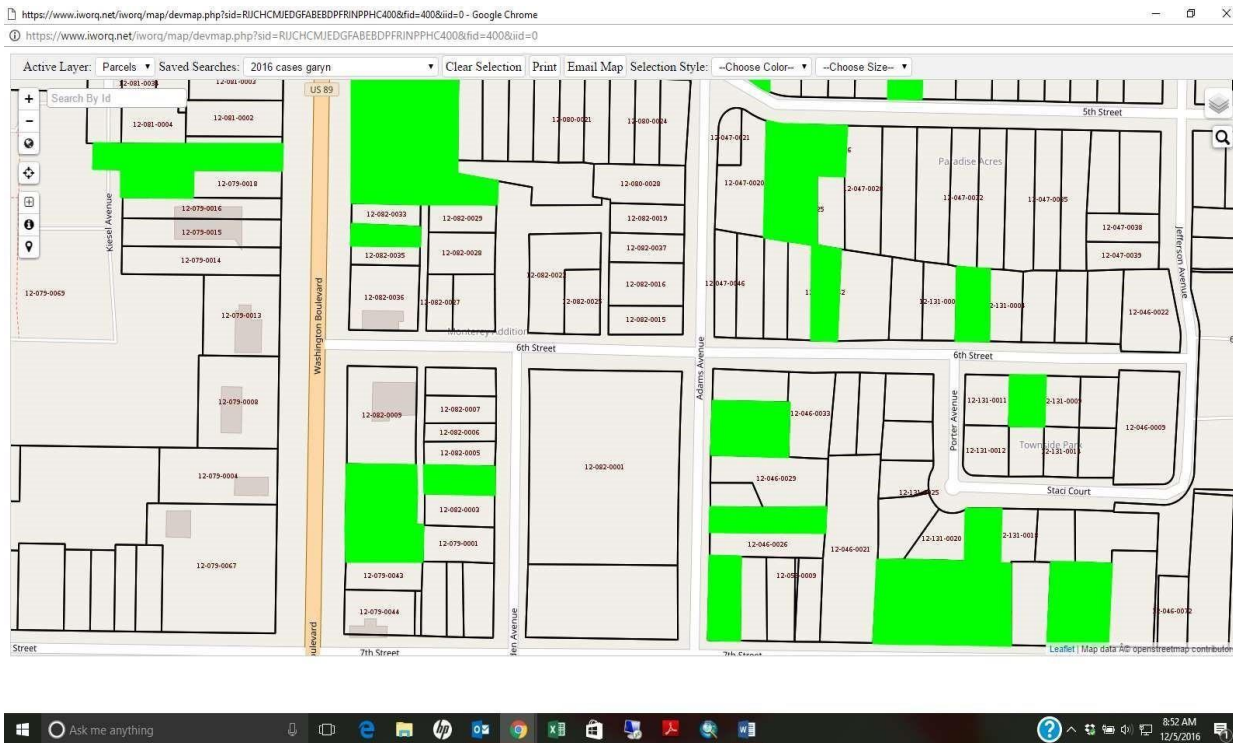

The above image shows how easy it is to create a permit template with prefilled information.

Figure 1.2

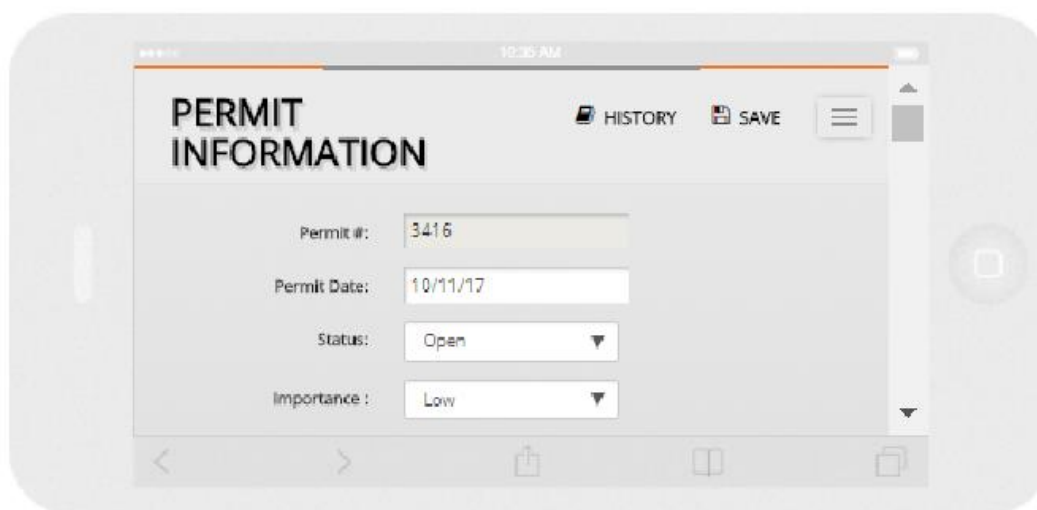

iWorQ's report builder provides a user interface that only requires a user to simply click on the "+" button below to instantly report on desired input. This enables you to add new fields when desired and create adhoc and saved reports.

Figure 1.3

Map above shows Responsive interface- Showing the parcel layer with highlighted parcels. The map is showing the permits issued last year. User can select, display, and edit data directly from the map.

Figure 1.4

The screenshot shows iWorQ's Mobile HTML 5 Interface making access in the field easy to use, which includes icons to help assure your field staff will be successful accessing the system.

Implementation Phases

Your project is configured through a four-phased approach that includes Initiation, Planning, Executing, and Closing phases. Throughout these phases, iWorQ bears the bulk of the project risk. We provide as much training and services as you need to be successful throughout the project.

This section discusses:

- *Initiation Phase*
- *Planning Phase*
- *Executing Phase*
- *Closing Phase*

Initiation Phase

During this phase, we install your software in our secure, hosted (SaaS) data center utilizing Amazon Web Services (AWS). During this phase, you should determine what staff members will assist with the project. We ask you to complete worksheets that allow us to import data into iWorQ dropdown fields. These worksheets do not require that you understand iWorQ data structures to complete this phase.

Planning Phase

During the Planning phase, the iWorQ project team works with your team to define how processes at Paris work today and how you would like your new system to operate going forward. As part of this, your team should analyze the reports and documents you currently have to determine which ones you need to have in iWorQ. Based on our discussions, we create a project plan that includes project timelines, goals, priorities, and responsibilities. Our project team will work with you to set a clear project plan with detailed requirements. Both teams follow this plan during the executing phase.

Executing Phase

During the Executing phase, we train your project team and together configure the solution. Concurrent with your system configuration, our data integration team will work with you to build data interfaces and migrate data if they are part of the project scope. After our teams complete these tasks, we train your staff members.

Your success is our highest priority. While each of our training phases has a specific plan, we provide additional or repeat trainings at no additional cost if necessary for a successful implementation. As a customer, we will provide additional training anytime it is desired for no additional cost. The time completion of project phases is often dependent upon Paris go-live goals and staff availability.

Go Live

After the configuration, iWorQ will train each of your staff members. During our training, attendees learn by doing actual data entry. They should come to the training with any materials they regularly use to enter cases (e.g., a stack of permits or code cases to be entered). Instructors will provide the training online. Instructors provide personal assistance to attendees, answer specific questions, and personalize teaching styles to meet the needs of individual attendees.

Closing Phase

During the closing phase, your iWorQ project team continues to work with you to answer any questions and resolve any configuration questions. We hold a project closure meeting to ensure a smooth transition from our project team to our iWorQ customer support team, who will support you going forward and as long as you are a customer.

Training

Your administrator and other individuals you designate receive several different types of training that cover iWorQ's key functionalities.

Our training involves guiding staff to use iWorQ to complete actual work tasks. Instructors provide personal assistance to attendees, answer specific questions, model examples and exercises, and personalize teaching styles to individual attendees. This informal style helps your staff relax and feel comfortable asking and responding to questions.

These trainings are described in further detail below:

Administrator Training: Administrator training teaches your iWorQ administrator(s) how to manage iWorQ going forward. This training covers items such as setting up code tables (options in drop-down lists); security rules; and iWorQ tools.

Configuration Training: During the configuration phase, your administrators make many decisions about configuring iWorQ to make your office its most efficient. During Configuration Training, iWorQ's project team helps trainees understand approaches, methodologies, and best practices for making these decisions and recognizing the ramifications of the decisions they make.

Go-Live Training: Prior to Go-Live, every user on the system will receive training pertinent to their role type on the system. We provide unlimited training during implementation and after Go-Live via conference calls, webinars, or online screen share and we offer an annual, national users' conference to learn new and advanced skills.

Paris/Bourbon County	Quote creation: 3/19/2020
525 High St Ste 108, Paris, KY 40361-1846	Prepared by: Carson Frandsen & Scott Jardine

1. QUOTE

Paris- hereafter known as "Customer", enters into the following Service Agreement with iWorQ Systems, "iWorQ", headquartered Logan, UT. Customer will pay an annual fee for the services and a one-time setup fee detailed below:
